

DERMA GROUP

Trusted globally for our advanced devices, accredited training, and the industry's leading aftercare service.

ABOUT Derma Group

At Derma Group Ltd, we combine experience, knowledge, and innovation to deliver advanced aesthetics and beauty technologies.

Our founders, Roberto and James, recognised the challenge clinics face in accessing high-end, affordable devices. With a shared passion for aesthetics, they created Derma Group to empower businesses with premium technology, tailored support, and sustainable growth opportunities. Today, we partner with clinics worldwide to expand treatment options, improve cashflow, and unlock new revenue streams — helping every client achieve their business goals with confidence.

Why partner with Derma Group?

Outstanding service, every step of the way

At Derma Group, we provide advanced medical-grade and beauty technologies at accessible prices — combining innovation, value, and a luxury customer experience.

We partner with our clients to understand their needs, deliver tailored solutions, and support long-term business growth. With flexible purchase options and a dedicated team, we make it easier for your clinic to grow with confidence.

We prioritise strong partnerships, transparent advice, and sustainable growth — combining advanced technology with tailored support to help every clinic succeed.

Clinically-Driven Innovation

Every device is backed by results, research, and real-world outcomes.

Relationship-Focused

From onboarding to long-term growth, we support you at every step.

Business-Building Support

Marketing assets, ongoing training, and smart finance options that help your clinic grow.

In-House Service & Repairs

UK-based support with fast turnaround times. No third-party delays.

Elite Training

Led by advanced practitioners who understand your client base — and your bottom line.

TRUSTED GLOBALLY

By hundreds of clinics for advanced devices, accredited training, and the industry's leading aftercare service.

DERMA ANALYZER

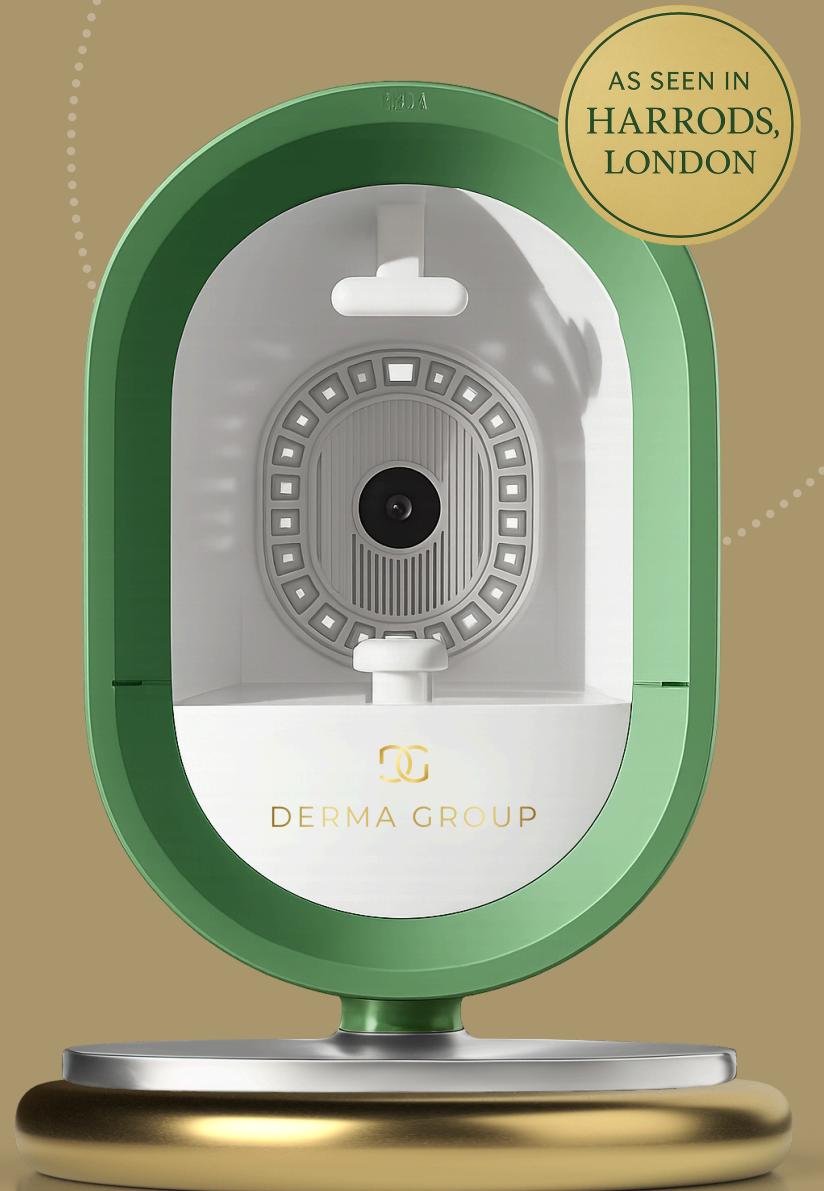

Where Precision Meets Innovation.

Designed to maximize exceptional results through a meticulous and comprehensive skin analysis.

- **High-definition imaging** — captures up to 28 million pixels for precise, detailed visuals.
- **Multi-spectrum lighting** — RGB, UV, and PL reveal surface and deeper skin layers.
- **Identifies key concerns** — pigmentation, pores, wrinkles, oil, and hydration.
- **AI-powered analysis** — delivers instant, data-driven skin reports.
- **Professional client reports** — branded summaries for clear treatment planning.
- **Compact and portable** — sleek, lightweight, and clinic-ready.
- **Seamlessly integrates** with Derma Group devices and products to boost consultation value.

Discover the Derma Analyzer

The Consultation Tool That Converts Clients Into Treatment Plans.

Unlock the full potential of every consultation with the Derma Analyzer, the ultimate skin analysis system for clinics that want to deliver results-driven, personalised treatments. By uncovering what lies beneath the surface, the Derma Analyzer builds trust, drives treatment uptake, and positions your clinic as a leader in advanced skincare.

Using state-of-the-art spectral imaging technology combined with 3D skin simulation and facial recognition, the device analyses 14 key indicators of skin health, including acne, pigmentation, wrinkles, UV damage, pores, texture, and sensitivity. This measurable and visual analysis allows you to create tailored skincare journeys that maximise treatment outcomes and client satisfaction.

Customise the device to your brand voice

The Derma Analyzer is more than just a diagnostic tool — it can be tailored to your business. Import your own products and treatments into the device, so clients receive recommendations that directly feature your skincare range. Add your logo, brand colours, products and professional identity, creating a seamless branded experience that reinforces your clinic's expertise.

With the Derma Analyzer, every consultation becomes an opportunity to educate, upsell, and transform your clients' skincare journey — making it one of the most profitable and professional additions to your clinic.

A powerful sales tool

Show clients visual evidence of their skin concerns, making it easier to recommend treatments and skincare.

Boost treatment results

By understanding the skin's deeper condition, you can choose the most effective treatment plans.

Stand-alone or add-on service

Offer as a consultation, or as part of a package to support ongoing treatment programmes.

Grow Your Clinic with Derma Analyzer

An investment in technology, an investment in growth.

Skin analysis software builds client trust and drives sales by visually showing skin concerns and progress. This personalised approach increases treatment bookings, product sales, and repeat visits — turning consultations into powerful revenue-generating opportunities.

Business Benefits

Builds Trust – Visual reports help clients clearly understand their skin.

Increases Sales – Makes it easier to recommend and upsell treatments.

Personalised Care – Tailors plans to each client's unique concerns.

Tracks Progress – Shows before-and-after results to prove effectiveness.

Professional Image – Positions your clinic as advanced and results-driven.

Boosts Revenue – More consultations convert into bookings and sales.

Client Loyalty – Keeps clients engaged with regular check-ups.

Accredited Training with Every Device

Delivered by experts, designed for confidence.

Every Derma Group device comes with delivery, professional set-up, and comprehensive treatment training — all included with your purchase. We believe that confidence and knowledge are just as important as technology, which is why we ensure you and your team are fully equipped from day one.

Certified to the Highest Standards

Quality, safety, and compliance built into every device.

At Derma Group, we are proud to be ISO 13485:2016 certified — the international gold standard for medical device quality management. This certification guarantees that every device we supply is designed and manufactured under the same rigorous system used for medical-grade equipment.

Our Commitment to Quality

- **ISO 13485:2016 Certified** – Independently audited to the international medical device standard.
- **Medical-Grade Quality** – Built under strict systems ensuring safety, traceability, and performance.
- **CE Compliant** – Devices meet European CE safety and performance standards.
- **International Standards** – Trusted by clinics worldwide.

What this means for you

- **Confidence** that every device is backed by internationally recognised certification.
- **Assurance** of safety, reliability, and compliance built into every stage of production.
- **Full documentation support** for clinics and distributors seeking local approvals.
