

# DERMA GROUP

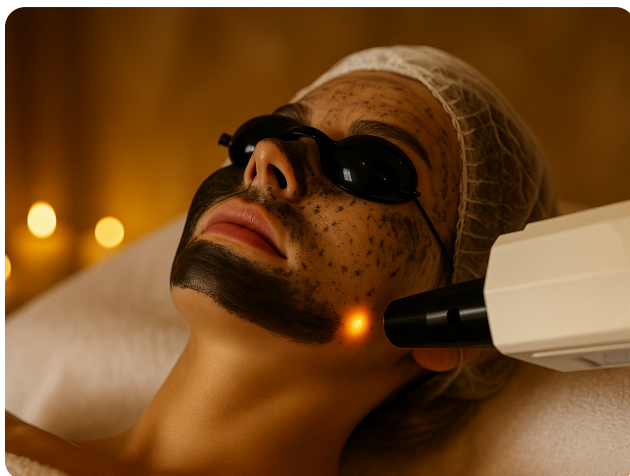

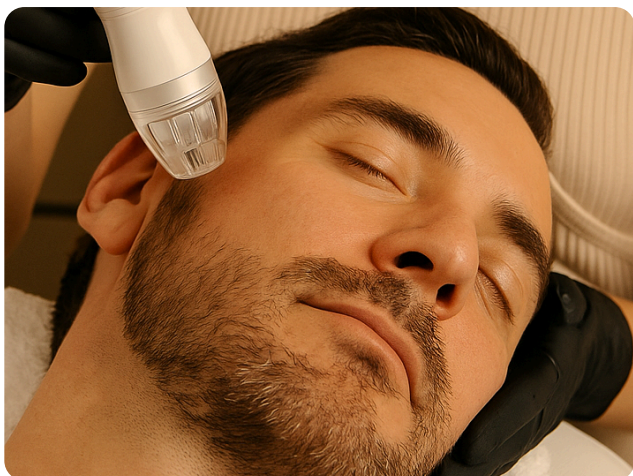

Trusted globally for our advanced devices, accredited training, and the industry's leading aftercare service.

# ABOUT Derma Group

At Derma Group Ltd, we combine experience, knowledge, and innovation to deliver advanced aesthetics and beauty technologies.

Our founders, Roberto and James, recognised the challenge clinics face in accessing high-end, affordable devices. With a shared passion for aesthetics, they created Derma Group to empower businesses with premium technology, tailored support, and sustainable growth opportunities. Today, we partner with clinics worldwide to expand treatment options, improve cashflow, and unlock new revenue streams — helping every client achieve their business goals with confidence.

# Why partner with Derma Group?

## Outstanding service, every step of the way

At Derma Group, we provide advanced medical-grade and beauty technologies at accessible prices — combining innovation, value, and a luxury customer experience.

We partner with our clients to understand their needs, deliver tailored solutions, and support long-term business growth. With flexible purchase options and a dedicated team, we make it easier for your clinic to grow with confidence.

We prioritise strong partnerships, transparent advice, and sustainable growth — combining advanced technology with tailored support to help every clinic succeed.

## Clinically-Driven Innovation

Every device is backed by results, research, and real-world outcomes.

## Relationship-Focused

From onboarding to long-term growth, we support you at every step.

## Business-Building Support

Marketing assets, ongoing training, and smart finance options that help your clinic grow.

## In-House Service & Repairs

UK-based support with fast turnaround times. No third-party delays.

## Elite Training

Led by advanced practitioners who understand your client base — and your bottom line.

## TRUSTED GLOBALLY

By hundreds of clinics for advanced devices, accredited training, and the industry's leading aftercare service.

DERMA CO2 LASER

# Unlock the Future of Flawless Skin

**With Fractional CO2: The Ultimate in Non-Surgical Skin Rejuvenation!**

- Utilised CO<sub>2</sub> laser for resurfacing and tightening.
- Targets wrinkles, scars, and uneven texture with precision.
- Promotes collagen renewal for lasting skin improvement.
- Adjustable intensity for powerful results with minimal downtime.
- Suitable for rejuvenation, scarring, and skin refinement.

# The laser that delivers real results.

**Rejuvenate skin, refine texture, and restore a youthful glow with the advanced fractional CO2 laser – the gold standard in skin resurfacing.**

**Introducing the Fractional CO2 Device:** your ultimate solution for achieving radiant, youthful skin without surgery for your clients. This cutting-edge technology utilised fractional laser resurfacing energy to target fine lines, wrinkles, acne scars, and uneven skin texture.

Ideal for skin types 1 to 4, the Fractional CO2 Laser JZ-3D device offers minimal downtime and maximum results, making it the perfect choice for anyone looking to revitalize their complexion and regain their confidence.

# Precision Engineered for Performance

Fractional technology penetrates deeply into skin tissue. The device emits a fractional laser composed of dots as fine as a hair, creating numerous tiny wounds on the skin that are invisible to the naked eye. The laser reaches the dermis directly, and through the process of destruction and reconstruction, it stimulates collagen regeneration. This results in the therapeutic effects of wrinkle reduction, skin rejuvenation, and scar improvement.

The carbon dioxide laser effectively treats fine to moderately deep wrinkles, photodamage, scars, skin discoloration, texture irregularities, and skin laxity. Our machine is equipped with three different types of treatment heads: fractional heads, vaginal heads, and cutting heads, each designed to achieve specific results.

By changing the treatment head, different effects can be achieved, making the Fractional CO2 device a versatile tool for various medical and cosmetic treatments.

**Fractional Head**

Primarily used for scar treatment, including prominent scars, stretch marks, and acne pits.

**Vaginal Treatment Head**

Designed to tighten the vaginal area, and is effective in treating postpartum urinary incontinence.

**Cutting Head**

Used for removing warts and performing simple surgical cuts.

# The Future of Skin Rejuvenation

From age-related changes to stubborn scars, the fractional CO2 laser precisely treats a range of skin concerns.

## Fine Lines & Facial Wrinkles

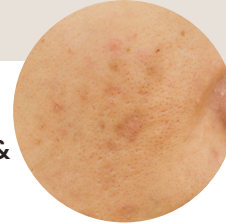

Reduces the appearance of facial lines by stimulating collagen and resurfacing the skin's top layers.

## Acne Scars

Smooths pitted and uneven skin caused by past breakouts, helping restore a refined surface.

## Sun Damage, Pigmentation & Age Spots

Treats pigmentation and texture changes caused by excessive sun exposure, revealing healthier skin.

## Uneven Skin Tone

Targets patchiness and discolouration for a more even, luminous complexion.

## Large Pores

Minimises pore size by improving skin structure and elasticity.

## Loose or Sagging Skin

Tightens and firms by boosting deep collagen production.

## Vaginal Tightening

For tightening the vaginal area and treating postpartum urinary incontinence.

## Scarring on Face & Body

Improves the texture of old surgical or injury scars for smoother, softer skin.

# Effective treatments, proven results.

**Help your clients say goodbye to unwanted tattoos and achieve clear, renewed skin!**

The fractional CO2 laser is one of the most sought-after skin rejuvenation treatments in the industry, for its ability to dramatically improve texture, tone, and overall skin quality.

Designed for clients who demand visible results with advanced technology, this luxurious procedure effectively targets fine lines, wrinkles, acne scars, and sun damage, while stimulating collagen production for long-term improvement.

# Grow Your Clinic with Derma CO2

**An investment in technology, an investment in growth.**

The Derma CO<sub>2</sub> delivers advanced fractional resurfacing to rejuvenate and renew the skin from within. By creating precise micro-channels in the skin's surface, it stimulates collagen production, smooths texture, and reduces the appearance of fine lines, wrinkles, and scarring.

Designed for precision and comfort, this system offers transformative results with minimal downtime—making it the ideal solution for clinics seeking to elevate their treatment portfolio and client satisfaction.

## Business Benefits

**Expand Your Treatment Menu** – Offer highly effective TR services

**Increase Client Loyalty** – Deliver visible results that keep clients returning.

**Boost Revenue** – Add high-value treatments with strong profit margins.

## Potential Revenue

Based on adding this treatment to your clinic menu:

**Weekly Growth:** +20–30% increase in total treatment revenue

**Monthly Growth:** +40–60% increase as client volume builds

**Annual Growth:** +200–400% uplift from repeat courses & new client acquisition

(Figures are indicative; actual growth varies based on clinic pricing and client volume.)

## Accredited Training with Every Device

**Delivered by experts, designed for confidence.**

Every Derma Group device comes with delivery, professional set-up, and comprehensive treatment training — all included with your purchase. We believe that confidence and knowledge are just as important as technology, which is why we ensure you and your team are fully equipped from day one.

# Certified to the Highest Standards

**Quality, safety, and compliance built into every device.**

At Derma Group, we are proud to be ISO 13485:2016 certified — the international gold standard for medical device quality management. This certification guarantees that every device we supply is designed and manufactured under the same rigorous system used for medical-grade equipment.

## Our Commitment to Quality

- **ISO 13485:2016 Certified** – Independently audited to the international medical device standard.
- **Medical-Grade Quality** – Built under strict systems ensuring safety, traceability, and performance.
- **CE Compliant** – Devices meet European CE safety and performance standards.
- **International Standards** – Trusted by clinics worldwide.

## What this means for you

- **Confidence** that every device is backed by internationally recognised certification.
- **Assurance** of safety, reliability, and compliance built into every stage of production.
- **Full documentation support** for clinics and distributors seeking local approvals.
