

DERMA GROUP

Trusted globally for our advanced devices, accredited training, and the industry's leading aftercare service.

ABOUT Derma Group

At Derma Group Ltd, we combine experience, knowledge, and innovation to deliver advanced aesthetics and beauty technologies.

Our founders, Roberto and James, recognised the challenge clinics face in accessing high-end, affordable devices. With a shared passion for aesthetics, they created Derma Group to empower businesses with premium technology, tailored support, and sustainable growth opportunities. Today, we partner with clinics worldwide to expand treatment options, improve cashflow, and unlock new revenue streams — helping every client achieve their business goals with confidence.

Why partner with Derma Group?

Outstanding service, every step of the way

At Derma Group, we provide advanced medical-grade and beauty technologies at accessible prices — combining innovation, value, and a luxury customer experience.

We partner with our clients to understand their needs, deliver tailored solutions, and support long-term business growth. With flexible purchase options and a dedicated team, we make it easier for your clinic to grow with confidence.

We prioritise strong partnerships, transparent advice, and sustainable growth — combining advanced technology with tailored support to help every clinic succeed.

Clinically-Driven Innovation

Every device is backed by results, research, and real-world outcomes.

Relationship-Focused

From onboarding to long-term growth, we support you at every step.

Business-Building Support

Marketing assets, ongoing training, and smart finance options that help your clinic grow.

In-House Service & Repairs

UK-based support with fast turnaround times. No third-party delays.

Elite Training

Led by advanced practitioners who understand your client base — and your bottom line.

TRUSTED GLOBALLY

By hundreds of clinics for advanced devices, accredited training, and the industry's leading aftercare service.

- Imaging system to visually prove progress
- ICE Contact Cooling System
- Universal Application – Suitable for all hair and skin types
- 30 million shot handle for longevity and reliability

WATCH DEVICE VIDEO

Revolutionise treatments in clinic

With the most personalised laser hair removal device available.

Target all hair types, across every Fitzpatrick type, with our advanced 4-wave laser diode. Featuring wavelengths of 755nm, 808nm, 904nm, and 1064nm, it penetrates deep into the dermis to safely and effectively disable hair follicles — delivering long-lasting results in as little as 6 sessions.

With specialised treatment modes (Rapid Removal, Free Laser, and Stamp Removal), practitioners can tailor treatments for all hair textures, including fine and stubborn growth. The digital display handle provides live shot counts, parameters, and up to 30 million shots, ensuring precision and efficiency.

An Android control system allows software updates, remote support, and secure storage of client treatment histories — offering a seamless, professional service.

Proven Progress. Trusted Technology.

- **Visual Progress Tracking**

With Imaging Progress Tracking, the Derma Quad turns every session into a visual journey with crystal-clear imaging to capture hair reduction progress and show clients real-time improvement

- **Hygiene Without Compromise**

The Derma Quad includes a UVC-254nm sterilisation system for flawless safety, with a specialist disinfection box that kills 99.99% of bacteria & viruses. The unit has 10,000-hour UV lamp for reliability and touch-free operation with automatic 5-minute sterilisation

- **Long lasting hair reduction in as little as 6 sessions**

- **Suitable for all hair and skin types**

- **4 powerful wavelengths for deeper penetration and lasting results**

- **30 million shot handle for longevity and reliability**

Effective treatments, proven results.

Help your clients say goodbye to unwanted hair and achieve permanently smooth, bare skin!

Offer your clients the luxury of permanently smooth, hair-free skin with the speed, precision, and comfort of the Derma Quad Laser. Suitable for all skin and hair types, most clients see results in around 6 sessions. Treatments can take around 30 minutes depending on the area, making it both convenient for clients and highly profitable for your clinic.

Grow Your Clinic with Derma Quad

An investment in technology, an investment in growth.

With state-of-the-art 4-wavelength diode technology, the Derma Quad delivers fast, effective, and virtually painless hair removal for all skin types. Offering long-lasting results, high client satisfaction, and the ability to treat a wide range of areas, the Derma Quad is the ultimate device for clinics seeking to expand their treatment portfolio and maximise revenue.

Business Benefits

Expand Your Treatment Menu – Offer highly effective LHR services

Increase Client Loyalty – Deliver visible results that keep clients returning.

Boost Revenue – Add high-value treatments with strong profit margins.

Potential Revenue

Based on adding this treatment to your clinic menu:

Weekly Growth: +20–30% increase in total treatment revenue

Monthly Growth: +40–60% increase as client volume builds

Annual Growth: +200–400% uplift from repeat courses & new client acquisition

(Figures are indicative; actual growth varies based on clinic pricing and client volume.)

Accredited Training with Every Device

Delivered by experts, designed for confidence.

Every Derma Group device comes with delivery, professional set-up, and comprehensive treatment training — all included with your purchase. We believe that confidence and knowledge are just as important as technology, which is why we ensure you and your team are fully equipped from day one.

Certified to the Highest Standards

Quality, safety, and compliance built into every device.

At Derma Group, we are proud to be ISO 13485:2016 certified — the international gold standard for medical device quality management. This certification guarantees that every device we supply is designed and manufactured under the same rigorous system used for medical-grade equipment.

Our Commitment to Quality

- **ISO 13485:2016 Certified** – Independently audited to the international medical device standard.
- **FDA Approved** – Manufactured in an FDA-registered facility ensuring quality and oversight.
- **Medical-Grade Quality** – Built under strict systems ensuring safety, traceability, and performance.
- **CE Compliant** – Devices meet European CE safety and performance standards.
- **International Standards** – Trusted by clinics worldwide.

What this means for you

- **Confidence** that every device is backed by internationally recognised certification.
- **Assurance** of safety, reliability, and compliance built into every stage of production.
- **Full documentation support** for clinics and distributors seeking local approvals.
