

DERMA GROUP

Trusted globally for our advanced devices, accredited training, and the industry's leading aftercare service.

ABOUT Derma Group

At Derma Group Ltd, we combine experience, knowledge, and innovation to deliver advanced aesthetics and beauty technologies.

Our founders, Roberto and James, recognised the challenge clinics face in accessing high-end, affordable devices. With a shared passion for aesthetics, they created Derma Group to empower businesses with premium technology, tailored support, and sustainable growth opportunities. Today, we partner with clinics worldwide to expand treatment options, improve cashflow, and unlock new revenue streams — helping every client achieve their business goals with confidence.

Why partner with Derma Group?

Outstanding service, every step of the way

At Derma Group, we provide advanced medical-grade and beauty technologies at accessible prices — combining innovation, value, and a luxury customer experience.

We partner with our clients to understand their needs, deliver tailored solutions, and support long-term business growth. With flexible purchase options and a dedicated team, we make it easier for your clinic to grow with confidence.

We prioritise strong partnerships, transparent advice, and sustainable growth — combining advanced technology with tailored support to help every clinic succeed.

Clinically-Driven Innovation

Every device is backed by results, research, and real-world outcomes.

Relationship-Focused

From onboarding to long-term growth, we support you at every step.

Business-Building Support

Marketing assets, ongoing training, and smart finance options that help your clinic grow.

In-House Service & Repairs

UK-based support with fast turnaround times. No third-party delays.

Elite Training

Led by advanced practitioners who understand your client base — and your bottom line.

TRUSTED GLOBALLY

By hundreds of clinics for advanced devices, accredited training, and the industry's leading aftercare service.

DERMA R|F V2

Next-Generation R|F Performance

Innovative treatments, with multiple options to achieve maximum results.

- **Advanced radio frequency system** — tightens, lifts, and rejuvenates skin from within.
- Delivers **controlled** thermal energy to stimulate collagen and elastin production.
- **Customisable** intensity levels for face and body treatments.
- **Non-invasive & invasive options**, that are comfortable with minimal downtime.
- **Visible firming** and contouring after just a few sessions.
- **Suitable for all skin types** and year-round treatments.
- **Premium design and build** — reliable, high-performance technology for professional clinics.

Precision RF Microneedling, Elevated

Luxury Technology. Exceptional Skin Results.

RF microneedling has transformed modern aesthetics — delivering smoother, tighter, more refined skin with minimal downtime. The Derma RFV2 brings this treatment into a new era, combining premium engineering with powerful, consistent performance. Unlike basic RF devices, the Derma RFV2 is built with luxury-grade components, gold-plated insulated needles, and refined energy delivery to ensure every treatment is smooth, controlled, and comfortable.

Each pulse of radio frequency is delivered with precision, maximising skin rejuvenation while maintaining exceptional safety.

The result? A beautifully engineered device that delivers reliable results, elevated treatment comfort, and a premium experience worthy of the Derma brand.

What makes Derma R|F V2 Different?

While many RF micro needling devices offer basic functionality, the Derma R|F V2 stands apart through its luxury engineering, enhanced comfort, and consistently powerful performance. Crafted with precision and built for modern aesthetics clinics, the Derma R|F V2 delivers controlled radiofrequency energy through gold-plated insulated needles, ensuring smoother treatments, improved patient comfort, and reliable results across every session.

This unique system:

- Luxury-grade build quality designed for stability, precision, and long-term durability
- Smooth, consistent energy delivery for effective skin tightening and rejuvenation
- Gold-plated insulated needles for enhanced safety and controlled heating
- Highly comfortable treatments with refined needling mechanics
- Professional-level results suitable for fine lines, texture, pores, scarring, and overall rejuvenation

Why it works

The combination of micro-needling + radiofrequency stimulates collagen and elastin, tightens skin, resurfaces texture, and smooths scars and wrinkles. Because energy penetrates deeper, results are faster, more dramatic, and longer lasting.

Clients love the visible improvements to:

Wrinkles & fine lines • Acne scars & stretch marks • Pores, tone & texture • Skin laxity on face, neck & décolleté • Body concerns like cellulite & hyperhidrosis

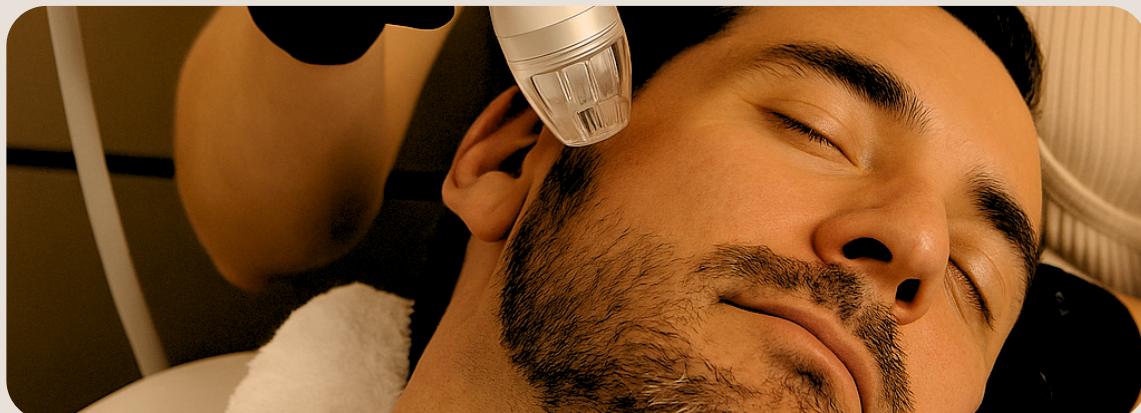

The Future of Skin Rejuvenation

Luxury engineering. Precision performance. Exceptional results.

The Derma RF V2 is more than an RF microneedling device — it's a premium, results-driven system designed to elevate your clinic's treatment standards. Built with refined mechanics, insulated gold-plated needles, and smooth energy delivery, the RFV2 ensures every treatment is comfortable, controlled, and consistently effective.

By offering advanced RF micro needling — one of the most in-demand treatments in aesthetics — your clinic can attract new clients, enhance treatment plans, and increase revenue through high-value skin rejuvenation packages.

Every RFV2 session becomes an opportunity to upsell, cross-sell, and deliver visible results your clients will return for — making it one of the most profitable and rewarding devices to add to your clinic.

Key Features

- **Advanced RF Microneedling** — Precise, controlled energy delivery for superior rejuvenation and tightening.
- **Fast & Comfortable** — Minimal downtime with refined needling mechanics and gold-plated insulated tips.
- **Versatile Treatments** — Effective for wrinkles, acne scars, pores, uneven texture, laxity, stretch marks, and overall skin rejuvenation.
- **High Profit Margins** — Low consumable cost and strong per-treatment return.
- **Client Loyalty** — Noticeable improvements encourage repeat sessions and long-term treatment courses.

Effective treatments, proven results.

More than a facial: a complete skin renewal system designed to refresh, restore and revitalise.

Treatments from the Derma R|FV2 offer low to minimal discomfort for your client, with no downtime, meaning your client can carry on about their day after the treatment, AND get phenomenal results.

With the Derma R|FV2, the already impressive results of our previous R|F device are now enhanced, offering a more efficient and effective solution for advanced aesthetic treatments.

Grow Your Clinic with Derma R|FV2

An investment in technology, an investment in growth.

The Derma R|F V2 delivers advanced Radiofrequency Micro-Needling designed for smoother, more comfortable treatments with minimal downtime. Using precision-controlled RF energy and gold-plated insulated needles, it rejuvenates, tightens, and refines the skin with exceptional consistency. From wrinkles and acne scars to stretch marks and overall skin texture, the RFV2 provides powerful, predictable results — all while boosting clinic revenue through high-margin treatments and repeat bookings.

Business Benefits

Expand Your Treatment Menu – Offer results-driven, cleansing facials

Increase Client Loyalty – Deliver visible results that keep clients returning.

Boost Revenue – Add high-value treatments with strong profit margins.

Potential Revenue

Based on adding this treatment to your clinic menu:

Weekly Growth: +20–30% increase in total treatment revenue

Monthly Growth: +40–60% increase as client volume builds

Annual Growth: +200–400% uplift from repeat courses & new client acquisition

(Figures are indicative; actual growth varies based on clinic pricing and client volume.)

Accredited Training with Every Device

Delivered by experts, designed for confidence.

Every Derma Group device comes with delivery, professional set-up, and comprehensive treatment training — all included with your purchase. We believe that confidence and knowledge are just as important as technology, which is why we ensure you and your team are fully equipped from day one.

Certified to the Highest Standards

Quality, safety, and compliance built into every device.

At Derma Group, we are proud to be ISO 13485:2016 certified — the international gold standard for medical device quality management. This certification guarantees that every device we supply is designed and manufactured under the same rigorous system used for medical-grade equipment.

Our Commitment to Quality

- **ISO 13485:2016 Certified** – Independently audited to the international medical device standard.
- **Medical-Grade Quality** – Built under strict systems ensuring safety, traceability, and performance.
- **CE Compliant** – Devices meet European CE safety and performance standards.
- **International Standards** – Trusted by clinics worldwide.

What this means for you

- **Confidence** that every device is backed by internationally recognised certification.
- **Assurance** of safety, reliability, and compliance built into every stage of production.
- **Full documentation support** for clinics and distributors seeking local approvals.
