

# DERMA GROUP

Trusted globally for our advanced devices, accredited training, and the industry's leading aftercare service.

# ABOUT Derma Group

At Derma Group Ltd, we combine experience, knowledge, and innovation to deliver advanced aesthetics and beauty technologies.

Our founders, Roberto and James, recognised the challenge clinics face in accessing high-end, affordable devices. With a shared passion for aesthetics, they created Derma Group to empower businesses with premium technology, tailored support, and sustainable growth opportunities. Today, we partner with clinics worldwide to expand treatment options, improve cashflow, and unlock new revenue streams — helping every client achieve their business goals with confidence.

# Why partner with Derma Group?

## Outstanding service, every step of the way

At Derma Group, we provide advanced medical-grade and beauty technologies at accessible prices — combining innovation, value, and a luxury customer experience.

We partner with our clients to understand their needs, deliver tailored solutions, and support long-term business growth. With flexible purchase options and a dedicated team, we make it easier for your clinic to grow with confidence.

We prioritise strong partnerships, transparent advice, and sustainable growth — combining advanced technology with tailored support to help every clinic succeed.

### Clinically-Driven Innovation

Every device is backed by results, research, and real-world outcomes.

### Relationship-Focused

From onboarding to long-term growth, we support you at every step.

### Business-Building Support

Marketing assets, ongoing training, and smart finance options that help your clinic grow.

### In-House Service & Repairs

UK-based support with fast turnaround times. No third-party delays.

### Elite Training

Led by advanced practitioners who understand your client base — and your bottom line.

## TRUSTED GLOBALLY

By hundreds of clinics for advanced devices, accredited training, and the industry's leading aftercare service.

DERMA T|R LASER

# Advanced Q-Switched Technology for Flawless Results

Offer the most effective laser tattoo removal and skin rejuvenation treatments with our Derma T|R.

- Multi-wavelength Q-Switched Nd:YAG laser for multi-colour tattoo removal, carbon facials, pigmentation and more.
- High energy output with short pulse duration for effective pigment fragmentation
- Ideal for tattoo removal, pigmentation, and carbon facials
- Compact, clinic-ready design with intuitive touch-screen interface

WATCH DEVICE VIDEO

# The Gold Standard in Tattoo Removal & Carbon Facials

Designed to deliver safe, effective, and versatile treatments.

Powered by advanced ND:YAG technology, the Derma TIR shatters pigment particles safely and with minimal discomfort. This makes it the ideal choice for complete tattoo removal as well as precise pigment correction and more.

Effective across all tattoo colours, the Derma TIR goes beyond ink removal, offering versatile treatments including pigmentation correction, vascular lesion reduction, rejuvenating carbon facials, and fungal nail clearance.

Delivering consistent, professional results with the strength of a Class IV laser, the Derma TIR is the ultimate device for clinics seeking advanced technology and multi-treatment capability in one platform.

# Precision Engineered for Performance

Developed to meet the demands of modern clinics, the Derma T|R combines triple-wavelength Q-Switched Nd:YAG technology with advanced cooling and intuitive digital control. Each wavelength has been engineered to deliver precise, consistent energy to target pigment at multiple skin depths, achieving safe and effective results across all skin types.

With ultra-short pulse durations and high repetition speeds, the Derma T|R ensures complete pigment fragmentation with minimal discomfort, maximising treatment efficiency and client satisfaction.

The ergonomic digital display handle allows full control over energy output and pulse frequency, while the integrated cooling system maintains epidermal protection throughout every session. Designed for versatility, the Derma T|R offers multi-treatment capability within one platform — from tattoo and pigmentation removal to rejuvenating carbon facials.

For clinics seeking a powerful, compact and results-driven laser solution, the Derma T|R delivers exceptional performance, reliability, and client comfort.

## Triple-Wavelength Precision

532 nm, 1064 nm and 1320 nm tips for complete multi-colour tattoo removal, pigmentation correction, and carbon peel rejuvenation.

## High Peak Power & Short Pulse Duration

Delivers rapid energy bursts to effectively shatter pigment particles while maintaining epidermal safety.

## Compact, Clinic-Ready Design

Lightweight, portable, and built for consistent, long-term performance across a wide range of treatments.

# Effective treatments, proven results.

**Help your clients say goodbye to unwanted tattoos and achieve clear, renewed skin!**

The Derma T|R Tattoo Removal System uses advanced laser technology to safely break down pigment while protecting surrounding skin. In addition, the device treats pigmentation, thread veins, and nail fungus, as well as performing the popular Carbon Doll Facial. Treatments are quick, effective, and highly profitable, with demand for safe tattoo removal continuing to rise.

# Grow Your Clinic with Derma T|R

**An investment in technology, an investment in growth.**

The Derma T|R uses triple-wavelength laser technology to remove a wide range of ink colours safely and effectively across all skin types.

Fast, precise, and designed for client comfort, it's the perfect addition for clinics wanting to expand services, boost results, and increase revenue.

## Business Benefits

**Expand Your Treatment Menu** – Offer highly effective TR services

**Increase Client Loyalty** – Deliver visible results that keep clients returning.

**Boost Revenue** – Add high-value treatments with strong profit margins.

## Potential Revenue

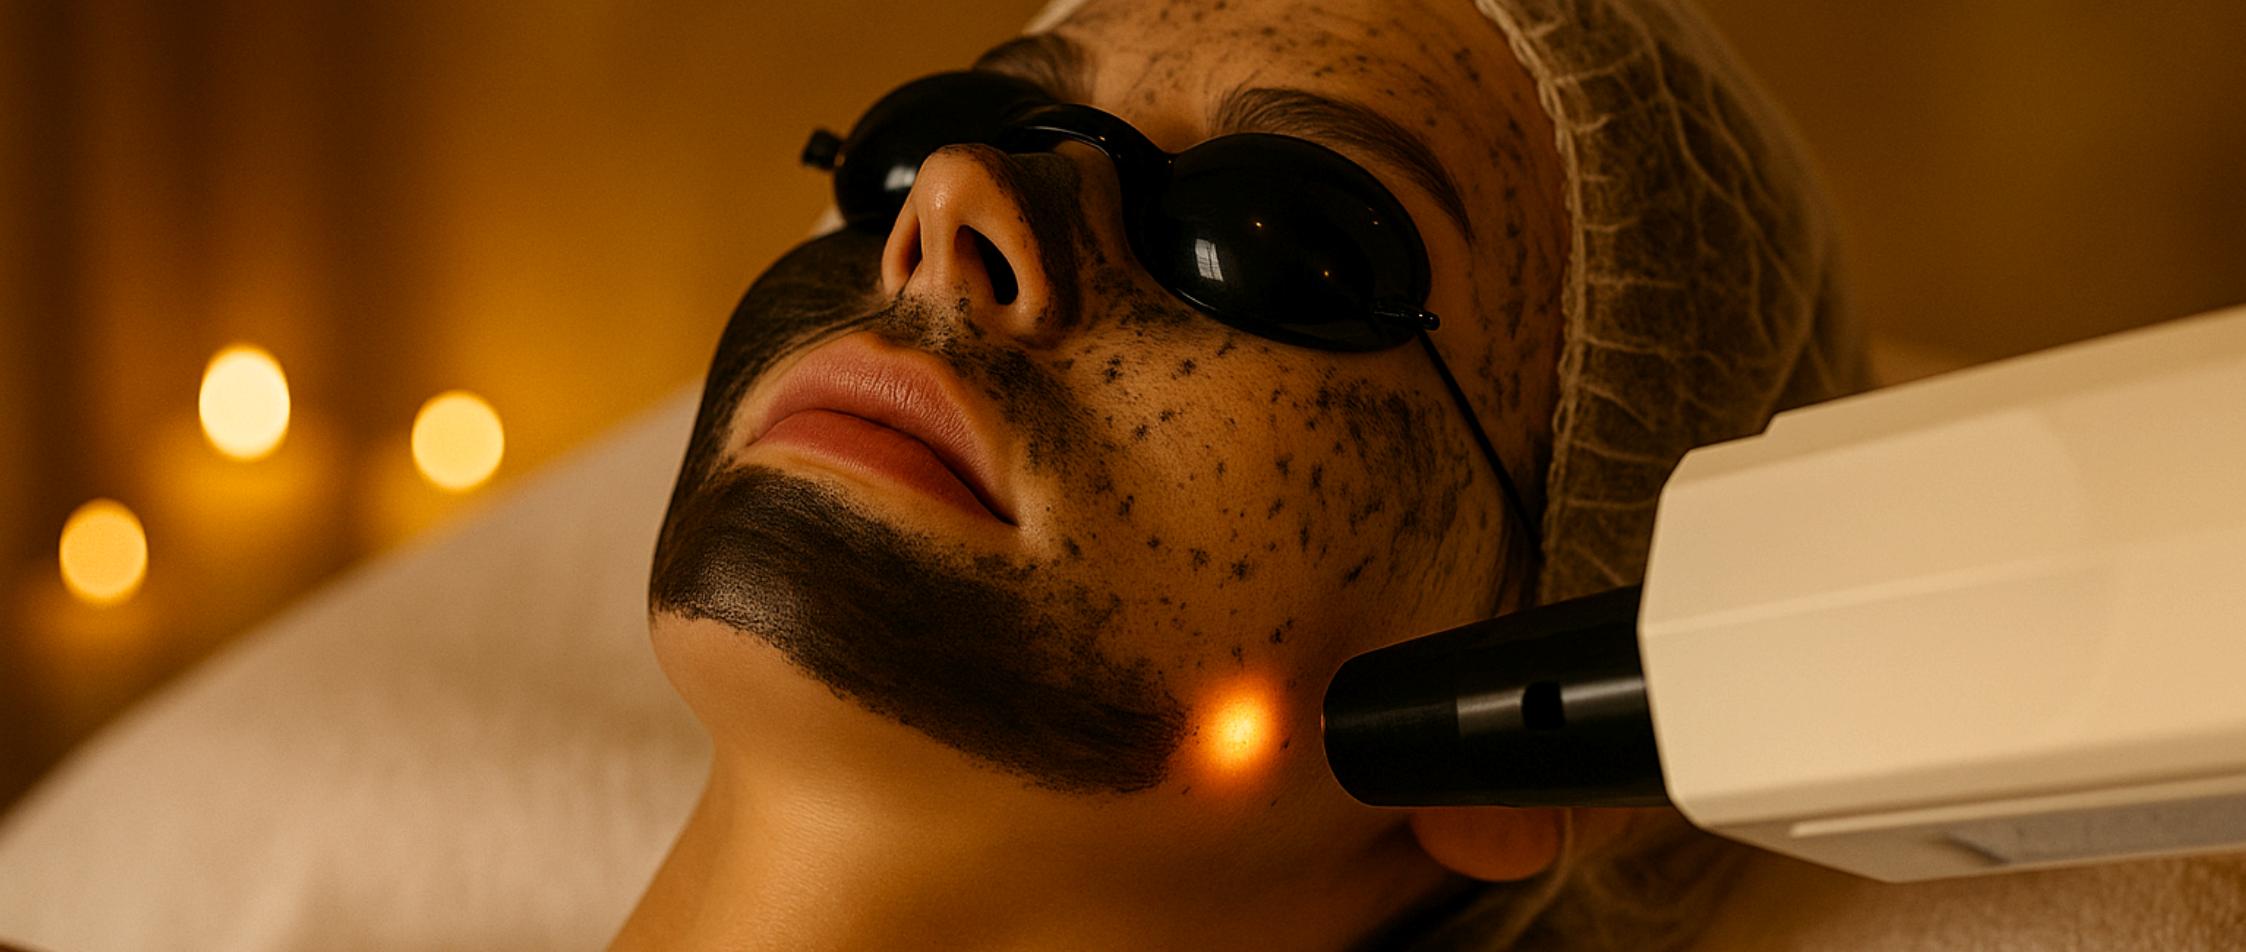

Based on adding this treatment to your clinic menu:

**Weekly Growth:** +20–30% increase in total treatment revenue

**Monthly Growth:** +40–60% increase as client volume builds

**Annual Growth:** +200–400% uplift from repeat courses & new client acquisition

(Figures are indicative; actual growth varies based on clinic pricing and client volume.)

# Accredited Training with Every Device

Delivered by experts, designed for confidence.

Every Derma Group device comes with delivery, professional set-up, and comprehensive treatment training — all included with your purchase. We believe that confidence and knowledge are just as important as technology, which is why we ensure you and your team are fully equipped from day one.

# Certified to the Highest Standards

## Quality, safety, and compliance built into every device.

At Derma Group, we are proud to be ISO 13485:2016 certified — the international gold standard for medical device quality management. This certification guarantees that every device we supply is designed and manufactured under the same rigorous system used for medical-grade equipment.

### Our Commitment to Quality

- **ISO 13485:2016 Certified** – Independently audited to the international medical device standard.
- **FDA Approved** – Manufactured in an FDA-registered facility ensuring quality and oversight.
- **Medical-Grade Quality** – Built under strict systems ensuring safety, traceability, and performance.
- **CE Compliant** – Devices meet European CE safety and performance standards.
- **International Standards** – Trusted by clinics worldwide.

### What this means for you

- **Confidence** that every device is backed by internationally recognised certification.
- **Assurance** of safety, reliability, and compliance built into every stage of production.
- **Full documentation support** for clinics and distributors seeking local approvals.
